

Allianz Dynamic Asian High Yield Bond - AM

Looking to Asia for attractive yield and long-term capital growth opportunities

Fund highlights

- The Fund focuses on USD denominated high yield bonds of Asian bond markets.
- The Fund is fundamentally driven across top-down macro research and in house bottom-up credit analysis to identify potential opportunities.
- The Fund actively manages tactical strategies such as portfolio overlays with the aim of generating investment performance and managing the impact of market volatility on the Fund. The Fund may use derivatives for hedging, efficient portfolio management and investment purposes. It will not invest extensively in FDI for investment purposes.

Opportunities¹⁰

- Interest income on bonds, capital gains opportunities on declining market yields
- Above-average return potential of high-yielding bonds and ABS/MBS
- Particular focus on the Asian market
- Broad diversification across numerous securities
- Possible extra returns through single security analysis and active management
- Potential currency gains with share classes not hedged against investor currency

Risks¹⁰

- Interest rates vary, bonds suffer price declines on rising interest rates
- High-yielding bonds and ABS/MBS entail above-average risk of volatility, illiquidity and capital loss. The volatility of fund unit prices may be strongly increased
- The Asian market may underperform at times
- Limited participation in the yield potential of single securities
- Success of single security analysis and active management not guaranteed
- Potential currency losses with share classes not hedged against investor currency

1. Calculated at the net asset value, excl. front-end load and redemption fees, distributions reinvested. Calculation according to method as defined by BVI, the German Fund Companies Association. Past performance is not a reliable indicator of future results. Any front-end loads and redemption fees reduce the capital employed and the performance stated.
2. This data is based on rolling 12-month periods as at 5/31/2022. It is presented in addition to the calendar year performance.
3. Dividend payments are applicable for Class AM Dis (monthly distribution) and for reference only. Yields are not guaranteed, dividend may be paid out from capital. Positive distribution yield does not imply positive return.
4. Annualized Dividend Yield = $[(1 + \text{Dividend Per Share} / \text{Ex-Dividend Date NAV})^{12} - 1] \times 100$. The annualized dividend yield is calculated based on the latest dividend distribution with dividend reinvested, and may be higher or lower than the actual annual dividend yield. Positive distribution yield does not imply positive return.
5. **Effective duration** is calculated using the approximate **duration** formula for a bond with an embedded option, reflecting the expected change in the cash flow caused by the option.
6. Represents the lowest potential yield that an investor could theoretically receive on the bond up to maturity if bought at the current price (excluding the default case of the issuer). The yield to worst is determined by making worst-case scenario assumptions, calculating the returns that would be received if worst-case scenario provisions, including prepayment, call or sinking fund, are used by the issuer (excluding the default case). It is assumed that the bonds are held until maturity and interest income is reinvested on the same conditions. Calculation is before currency hedging. The yield to worst is a portfolio characteristic; in particular, it does not reflect the actual fund income. The expenses charged to the fund are not taken into account. As a result, the yield to worst is not suitable as an indicator of the future performance of a bond fund. Forecasts are not a reliable indicator of future results.
7. The average credit quality methodology excludes non-rated investments and includes cash.
8. Breakdown based on best available rating for each security. Data published by index provider are based on average ratings and may be different.
9. If the acquisition of Fund units is subject to a sales charge, up to 100% of such sales charge may be collected by the distributor; the exact amount shall be mentioned by the distributor as part of the investment advisory process. This also applies to any payment by the Management Company of an ongoing distribution fee from the all-in fee to the distributor. The all-in fee includes the expenses previously called management, administration and distribution fees.
10. The liquidity of some of the market segments this fund invests in may be limited or even severely limited, as many market makers have significantly reduced their activities in these segments due to regulatory constraints. This may lead to a situation where fund assets can only be divested at a discount (due to a widening of the bid-ask spread) or with a certain delay.
